## THE POLYPROPYLENE DRAINAGE CHANNELS

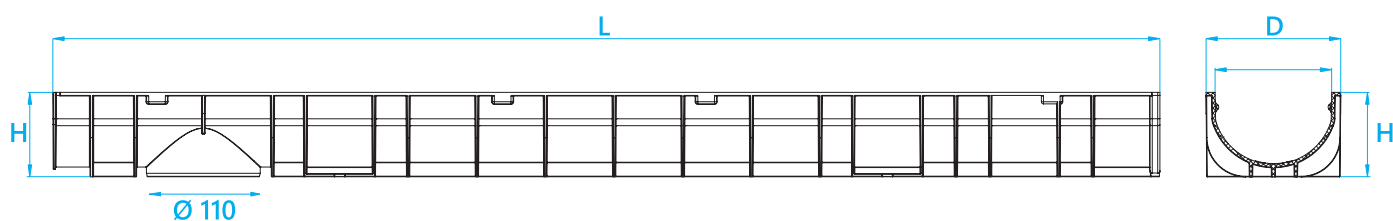

The **STORA LIGHT** is a lightweight channel with level invert. Contrary to the polyester concrete channels from the STORA-DRAIN range, the **STORA LIGHT** channel is made of polypropylene. The channel was designed to be used around private houses. The **STORA LIGHT** channel can be combined only with slotted galvanised FIX grating from the standard STORA SELF width B=100 range. The 8cm high is perfectly appropriate for installing in block paving.
